

CATALOGO 2024 / CATALOGUE 2024

GALTA

AGM

CE

 **CCQS UK**

The logo features a stylized letter 'E' composed of several stars of different sizes, surrounded by a circle of smaller stars.

 **RINA**

The logo consists of the word 'RINA' in a bold, dark blue sans-serif font, with a teal vertical bar graphic element to its left.

Galta è una realtà dinamica con una storia semplice ed esemplare: la passione di grandi professionisti per il settore automotive unita all'esperienza trentennale dello staff, ha sviluppato una imprenditoria all'avanguardia che ha lo scopo di fornire un prodotto mirato a soddisfare le esigenze dei suoi clienti a livello mondiale.

La scelta di offrire 2 linee di prodotto consente a Galta di soddisfare le esigenze dei diversi mercati sia dal punto di vista qualitativo che economico, garantendo al prodotto finito l'ineguagliabile caratteristica della **qualità made in italy**.

Galta è specializzata nel realizzare, partendo dalla progettazione fino al prodotto finito, una completa gamma di sollevatori ad elevatissimo standard:

Grandi Forbici da allineamento da 4T a 6T	Ponti a 4 colonne piani e da assetto da 3.5T a 5.5T
Doppi Forbici con sgancio sicure meccanico/idraulico da 3T a 4T	Ponti fissi e mobili per cambio gomme
Ponti a 2 colonne elettromeccanici/elettroidraulici da 4T a 7T	Ponti da moto
Ponti da carrozzeria e cabine di verniciatura	Traverse di sollevamento ausiliarie da 2T a 3T

La qualità dei nostri prodotti è garantita da:

- forti investimenti in tecnologia che hanno lo scopo di innovare e mantenere all'avanguardia tutte le linee di prodotti.
- un selezionato e affidabile parco fornitori localizzato nel raggio di pochi chilometri dal nostro stabilimento.
- uno staff produttivo con decenni di esperienza formato da ingegneri, disegnatori tecnici e operai specializzati.
- un rigoroso controllo qualità ed un costumer service veloce e sempre reperibile.

Galta si avvale di più di **14.000Mq di stabilimenti**: 4000mq in Italia, a Montecchio Maggiore (VI), che ospitano il reparto produttivo, lo showroom, gli uffici amministrativi/commerciali e la direzione; a supporto della realizzazione di componenti di carpenteria un secondo stabilimento estero di oltre 10.000mq.

Il team commerciale di Galta è strutturato e organizzato in modo da interpretare al meglio le esigenze del mercato e dei suoi partner commerciali: attraverso una selezionata rete di distributori e rivenditori fidelizzati, dislocati in più di 45 paesi del mondo, Galta commercializza i propri prodotti sviluppando per il 75 % il proprio volume d'affari sul mercato estero, di cui il 40% in Europa.

Grazie ad una esperta e virtuosa filiera professionale, formata da oltre 28 distributori e più di 40 installatori certificati, il brand Galta è capillarmente presente sul suolo nazionale.

Il nostro motto è **"BORN TO LIFT"**: le nostre attrezzature sono "nate per sollevare" e così anche lo staff Galta punta ad innalzare costantemente il livello di qualità dei propri prodotti e servizi garantendo soluzioni tecnologiche affidabili e durature nel tempo.

Galta is a dynamic company with a simple and remarkable history: the passion of great industry professionals in the automotive sector, combined with the thirty-year experience of the staff, has developed a leading-edge business that aims to provide a product targeted to meet the needs of its global customers.

The choice of supplying the market with 2 product lines allows Galta to satisfy the market in quality and economic terms, ensuring to the finished product the incomparable feature of the **Made in Italy**.

Starting from the design to the finished product Galta specializes in the manufacturing of a wide range of high-quality lifts:

Big Scissor Lifts for alignment - 4T to 6T capacity	4 Post Lifts alignment and flat version – 3.5T to 5.5T capacity
Double Scissor Lifts with mechanical/hydraulic safety release – 3T to 4T	Fixed and Mobile lifts for Tire Shop
Electromechanic/electro-hydraulic 2 post lifts – 4T to 7T capacity	Motorcycle lifts
Lifts for garage and spray booths	Rolling Jack: manual and pneumo-hydraulic - 2T/3T

The quality of our products is guaranteed thanks to:

- high investments in technology aimed at innovating and keeping all product lines at the forefront.
- a selected list of approved and reliable suppliers located within a few miles from our plant.
- a production crew, with decades of experience, made up of engineers, technical draftsman and skilled workers.
- strict quality controls and a fast and readily customer service.

Galta makes use of more than **14,000 square meters of plants**: a 4000 square meters property is located in Italy, Montecchio Maggiore (VI) and it houses the production department, the showroom, the administrative / commercial offices and the management; a second overseas plant of over 10,000 square meters is used for the construction of carpentry components.

Galta's sales team is structured and organized to interpret efficiently the needs of the market and of its trading partners requests. GALTA markets its products through a selected network of loyal distributors and resellers, located in more than 45 countries around the world, and it has developed 75% of its turnover on the foreign market, 40% of which in Europe.

Thanks to an expert and virtuous professional chain of over 28 distributors and more than 40 certified installers, the Galta brand is widely present within the Italian territory.

Just as our products are **"BORN TO LIFT"** the Galta staff also strive to constantly raise the level of quality of its products and services, guaranteeing reliable and long-lasting technological solutions.

LIFT IT TO BELIEVE IT !!!

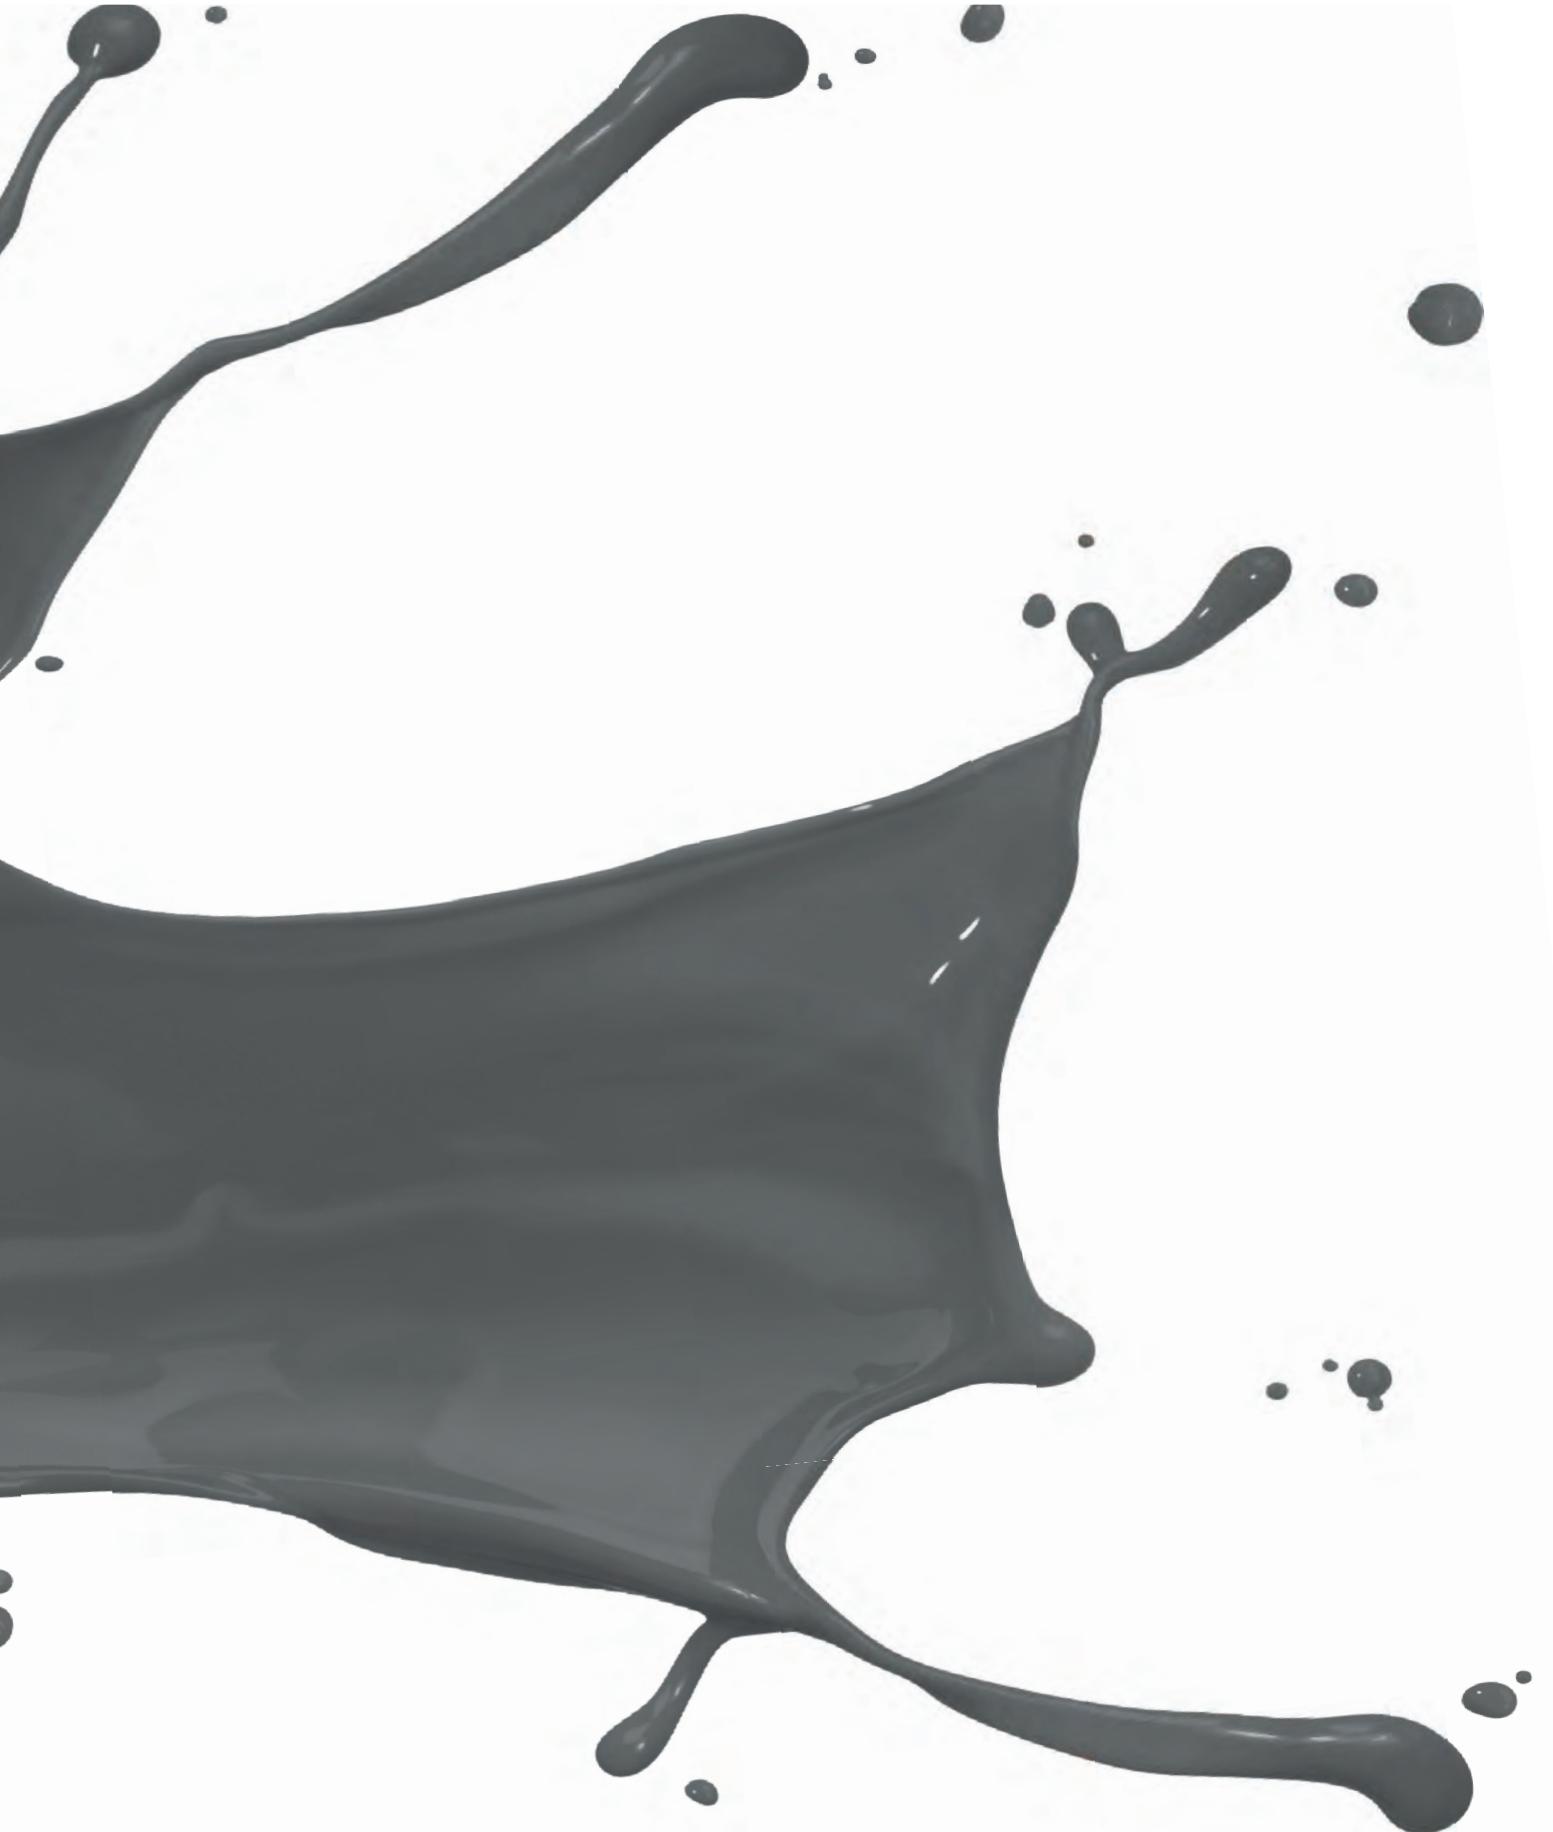

GALTA is a PERMANENT EXHIBITOR in:

ON REQUEST

SU RICHIESTA

ANTI CORROSION TREATMENTS

TRATTAMENTI ANTI CORROSIONE

On request and with extra charge all models of **BLUE LINE** can be supplied with the following anti-corrosion special treatments:

A richiesta e con sovrapprezzo sono disponibili i seguenti trattamenti speciali anti corrosione per tutti i modelli della **BLUE LINE**:

- Sandblasting / Sabbiatura
- Cataphoresis / Cataforesi

All models of **GREY LINE** have the standard sandblasting treatment.

Tutti i modelli della **GREY LINE** ricevono il trattamento di sabbiatura standard.

RAL AVAILABLE

RAL DISPONIBILI

BLUE LINE:

The standard color is

RAL 5002 (Blue) / Colore standard RAL 5002 (Blue)

or RAL 7016 (Dark grey) / Colore standard RAL 7016 (Grigio Scuro)

All other RAL are available on request with a price surcharge / Tutte le altre RAL sono disponibili con sovrapprezzo.

GREY LINE:

The standard color is RAL 7016 (Dark grey), RAL 7040 (Light grey).

Colore standard RAL 7016 (Grigio scuro), RAL 7040 (Grigio chiaro) e RAL 3002 (Rosso).

Portata max.	Max. capacity	Max. Tragfähigkeit	Portée max.	kg 3000
Tempo di salita / discesa	Lifting / lowering time	Hubfahrt-/Senkfahrtzeit	Temps de montée / descente	s 20/20
Alimentazione	Power supply	Stromversorgung	Alimentation	230-400V 3ph 50-60Hz
Potenza motore	Electric motor power	Motorleistung	Puissance du moteur	kW 2,6 (400V 3ph 50Hz)
Altezza max.	Max height	Max Höhe	Hauteur maxi	mm 960
Tensione circuito comandi	Circuit voltage command	Leerlaufspannung Befehl	Circuit de commande de tension	V 24

- Rampette di salita e discesa di facile movimentazione
 - Sincronismo idraulico delle pedane
 - Sicurezza idraulica in caso di sovraccarico e rottura tubi idraulici
 - Comandi uomo presente, 24V
 - Serie 4 tamponi in gomma standard h=60mm
 - Comando di sicurezza ultimo tratto di discesa con segnale acustico
-
- Leicht zu befahrende Rampen
 - Hydraulische Synchronisation der Plattformen
 - Hydraulische Sicherheit bei Überlastung und Bruch von Hydraulikleitungen
 - Totmannkontrollen, 24V
 - Serie von 4 Standardgummipads h = 60mm
 - Sicherheitsbefehl für den letzten Abstiegsabschnitt mit akustischem Signal
-
- Rampas fáciles de subir y bajar
 - Sincronismo hidráulico de las plataformas
 - Seguridad hidráulica en caso de sobrecarga y rotura de tuberías hidráulicas.
 - Controles de hombre muerto, 24V
 - Serie de 4 almohadillas de goma estándar h = 60 mm
 - Comando de seguridad para la última sección de descenso con señal acústica
-

- Easy to move up and down ramps
 - Hydraulic synchronism of the platforms
 - Hydraulic safety in case of overload and breakage of hydraulic pipes
 - Dead man controls, 24V
 - Series of 4 standard rubber pads h = 60mm
 - Safety command for the last section of descent with acoustic signal
-
- Rampes de montée et de descente faciles à déplacer
 - Synchronisme hydraulique des plates-formes
 - Sécurité hydraulique en cas de surcharge et de rupture des conduites hydrauliques
 - Commandes homme mort, 24V
 - Série de 4 patins en caoutchouc standard h = 60 mm
 - Commande de sécurité pour la dernière étape de descente avec signal acoustique

OPTIONAL Rampe ausiliarie / Auxiliary drive on-/drive-off ramps

- Sollevatore elettroidraulico con connessione a fune metallica e basamento portante
- Due cilindri di sollevamento in spinta
- Bracci a tre stadi anteriori e posteriori per il sollevamento anche di veicoli larghi e profilobasso.
- Valvole di sicurezza per sovraccarichi e rottura di tubi idraulici
- Valvola di controllo della velocità di discesa
- Dispositivo di appoggio meccanico ad inserimento automatico e disinserimento elettrico
- Funzionamento: elettroidraulico
- Electrohydraulic lifter with connection to wire rope and supporting base
- Two lifting cylinders in push
- Front and rear three-stage arms for lifting even wide and low profile vehicles.
- Safety valves for overloads and breakage of hydraulic pipes
- Descent speed control valve
- Mechanical support device with automatic insertion and electrical disconnection

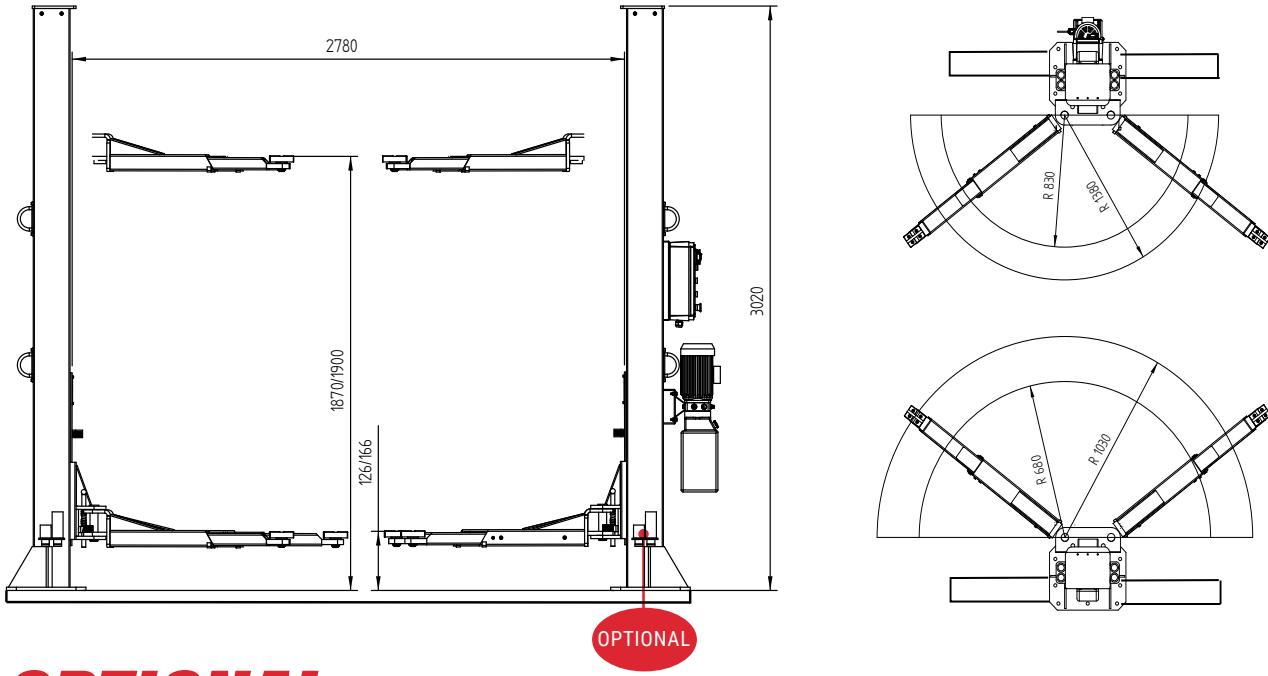

- Operation: electro-hydraulic
- Elektrohydraulischer Lifter mit Anschluss an Drahtseil und Stützfuß
- Zwei Hubzylinder im Druck
- Dreistufige Arme vorne und hinten zum Anheben auch von Fahrzeugen mit breitem und niedrigem Profil.
- Sicherheitsventile gegen Überlastung und Bruch von Hydraulikleitungen
- Regelventil für die Abstiegsgeschwindigkeit
- Mechanische Stützvorrichtung mit automatischem Einsetzen und elektrischer Trennung
- Bedienung: elektrohydraulisch

- Élévateur électrohydraulique avec connexion au câble métallique et à la base de support
- Deux vérins de levage en poussée
- Bras à trois étages avant et arrière pour soulever des véhicules même larges et bas.
- Soupapes de sécurité pour surcharges et rupture de conduites hydrauliques
- Valve de contrôle de la vitesse de descente
- Dispositif de support mécanique avec insertion automatique et déconnexion électrique
- Fonctionnement: électro-hydraulique
- Elevador electrohidráulico con conexión a cable y base de apoyo
- Dos cilindros de elevación en empuje
- Brazos de tres etapas delanteros y traseros para levantar incluso vehículos de perfil ancho y bajo.
- Válvulas de seguridad para sobrecargas y rotura de tuberías hidráulicas
- Válvula de control de velocidad de descenso
- Dispositivo de soporte mecánico con inserción automática y desconexión eléctrica
- Operación: electrohidráulica

- Sollevatore elettroidraulico con connessione a fune metallica e traversa portante
- Due cilindri di sollevamento in spinta
- Bracci a tre stadi anteriori e posteriori per il sollevamento anche di veicoli larghi e profilobasso.
- Valvole di sicurezza per sovraccarichi e rottura di tubi idraulici
- Valvola di controllo della velocità di discesa
- Dispositivo di appoggio meccanico ad inserimento automatico e disinserimento elettrico
- Funzionamento: elettroidraulico

- Electrohydraulic lifter with connection to wire rope and carrying cross member
- Two lifting cylinders in push

• Front and rear three-stage arms for lifting even wide and low profile vehicles.

• Safety valves for overloads and breakage of hydraulic pipes

• Descent speed control valve

• Mechanical support device with automatic insertion and electrical disconnection

• Operation: electro-hydraulic

• Elektrohydraulischer Lifter mit Anschluss an Drahtseil und Tragquerträger

• Zwei Hubzylinder im Druck

• Dreistufige Arme vorne und hinten zum Anheben auch von Fahrzeugen mit breitem und niedrigem Profil.

• Sicherheitsventile gegen Überlastung und Bruch von Hydraulikleitungen

• Regelventil für die Abstiegsgeschwindigkeit

• Mechanische Stützvorrichtung mit automatischem Einsetzen und elektrischer Trennung

• Bedienung: elektrohydraulisch

• Élévateur électrohydraulique avec connexion au câble métallique et traverse de transport

• Deux vérins de levage en poussée

• Bras à trois étages avant et arrière pour soulever des véhicules même larges et bas.

• Soupapes de sécurité pour surcharges et rupture de tuyaux hydrauliques

• Valve de contrôle de la vitesse de descente

• Dispositif de support mécanique avec insertion automatique et déconnexion électrique

• Fonctionnement: électro-hydraulique

• Elevador electrohidráulico con conexión a cable y travesaño portante

• Dos cilindros de elevación en empuje

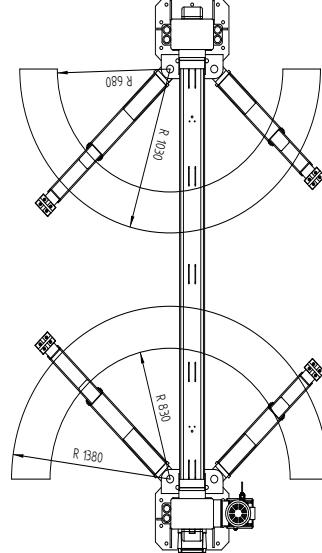

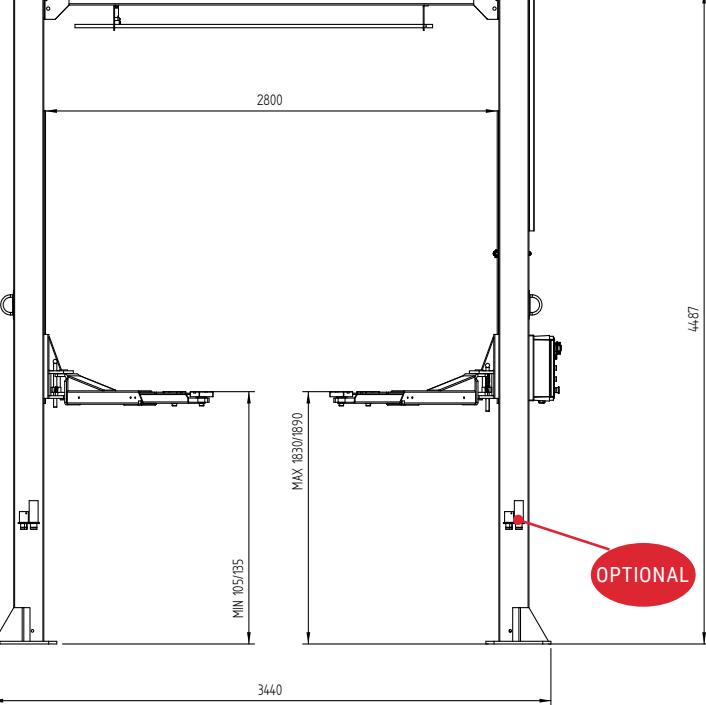

• Brazos de tres etapas delanteros y traseros para levantar incluso vehículos de perfil ancho y bajo.

• Válvulas de seguridad para sobrecargas y rotura de tuberías hidráulicas

• Válvula de control de velocidad de descenso

• Dispositivo de soporte mecánico con inserción automática y desconexión eléctrica

• Operación: electrohidráulica

- Sollevatore asimmetrico senza base con traversa portante
- Due cilindri di sollevamento in tiro che non richiedono alcuna manutenzione.

- Bracci corti a tre stadi anteriori e posteriori ribassati per il sollevamento anche di veicoli larghi e profilobasso.
- Altezza minima tamponi di soli 95 mm
- Valvole di sicurezza per sovraccarichi e rottura di tubi idraulici
- Valvola di controllo della velocità di discesa
- Dispositivo di appoggio meccanico ad inserimento automatico e disinserimento manuale
- Funzionamento: elettroidraulico

- Asymmetrical lifter without base with carrying crossbar
- Two lifting cylinders in pull that require no maintenance.
- Short arms with three front stages and rear stages for lifting even large vehicles and low profile.
- Minimum pad height of only 95 mm
- Safety valves for overloads and breakage of hydraulic pipes
- Descent speed control valve
- Mechanical support device with automatic insertion and manual disconnection
- Operation: electro-hydraulic

- Asymmetrischer Lifter ohne Sockel mit tragender Querstange
- Zwei Hubzylinder im Zug, die keine Wartung erfordern.
- Kurze Arme mit drei Stufen vorne und hinten abgesenkt, um auch große Fahrzeuge und niedriges Profil anzuheben.
- Mindestpolsterhöhe von nur 95 mm
- Sicherheitsventile für Überlastungen und Bruch von Hydraulikleitungen
- Regelventil für die Abstiegs geschwindigkeit
- Mechanische Stützvorrichtung mit automatischem Einsetzen und manuellem Trennen
- Betrieb: elektrohydraulisch

- Élévateur asymétrique sans base avec barre de transport
- Deux vérins de levage en traction qui ne nécessitent aucun entretien.
- Bras courts avec trois étages avant et arrière abaissés pour soulever même de gros véhicules et un profil bas.
- Hauteur minimale du patin de seulement 95 mm
- Soupapes de sécurité pour les surcharges et la rupture des tuyaux hydrauliques
- Vanne de régulation de vitesse de descente
- Dispositif de support mécanique avec insertion automatique et déconnexion manuelle
- Fonctionnement: électro-hydraulique

- Elevador asimétrico sin base con barra transversal
- Dos cilindros de elevación en tracción que no requieren mantenimiento.
- Brazos cortos con tres etapas delanteras y traseras bajadas para levantar incluso vehículos grandes y de bajo perfil.
- Altura mínima de la almohadilla de solo 95 mm.
- Válvulas de seguridad para sobrecargas y roturas de tuberías hidráulicas.
- Válvula de control de velocidad de descenso
- Dispositivo de soporte mecánico con inserción automática y desconexión manual.
- Operación: electrohidráulico

H=+198 H=+143 H=+113

Modello equipaggiato con 4 speciali bracci extra lunghi a doppio snodo: ideali per il sollevamento dalla city car come la Smart ai più grandi veicoli commerciali come lo Sprinter passo lungo

4 special extra long double jointed arms perfect for the lifting of both city cars such as Smart and the biggest trucks such as Sprinter long wheel base

4 spezielle extra lange Tragarme mit Doppelgelenke: ideal zum Heben der kleinsten Pkw wie der Smart bis zu den größten Kastenwagen wie der Sprinter mit langem Radstand

Modèle équipé de 4 bras spéciaux extra longs à double articulation: l'idéal pour le levage de tous types de véhicules, de la petite voiture comme la Smart jusqu'aux fourgons les plus grands comme le Sprinter à long empattement

Modelo equipado con 4 brazos extra-largos de doble unión: las armas ideales para levantar desde vehículos tan pequeños como la city car Smart hasta vehículos con distancia larga entre ejes como el Sprinter

Bras prévus pour le montage rapide de rallonges

Brazos predisuestos para el alojamiento rápido de suplementos

TOT LENGTH=2050MM

- Sollevatore asimmetrico senza base con traversa portante
- Due cilindri di sollevamento in tiro che non richiedono alcuna manutenzione.
- Bracci corti a tre stadi anteriori e posteriori ribassati per il sollevamento anche di veicoli larghi e profilobasso.
- Altezza minima tamponi di soli 95 mm
- Valvole di sicurezza per sovraccarichi e rottura di tubi idraulici
- Valvola di controllo della velocità di discesa
- Dispositivo di appoggio meccanico ad inserimento automatico e disinserimento manuale
- Funzionamento: elettroidraulico

- Asymmetrical lifter without base with carrying crossbar
- Two lifting cylinders in pull that require no maintenance.
- Short arms with three front stages and rear stages for lifting even large vehicles and low profile.
- Minimum pad height of only 95 mm
- Safety valves for overloads and breakage of hydraulic pipes
- Descent speed control valve
- Mechanical support device with automatic insertion and manual disconnection
- Operation: electro-hydraulic

- Asymmetrischer Lifter ohne Sockel mit tragender Querstange
- Zwei Hubzylinder im Zug, die keine Wartung erfordern.
- Kurze Arme mit drei Stufen vorne und hinten abgesenkt, um auch große Fahrzeuge und niedriges Profil anzuheben.
- Mindestpolsterhöhe von nur 95 mm
- Sicherheitsventile für Überlastungen und Bruch von Hydraulikleitungen
- Regelventil für die Abstiegsgeschwindigkeit
- Mechanische Stützvorrichtung mit automatischem Einsetzen und manuellem Trennen
- Betrieb: elektrohydraulisch

- Élévateur asymétrique sans base avec barre de transport
- Deux vérins de levage en traction qui ne nécessitent aucun entretien.
- Bras courts avec trois étages avant et arrière abaissés pour soulever même de gros véhicules et un profil bas.
- Hauteur minimale du patin de seulement 95 mm
- Soupapes de sécurité pour les surcharges et la rupture des tuyaux hydrauliques
- Vanne de régulation de vitesse de descente
- Dispositif de support mécanique avec insertion automatique et déconnexion manuelle
- Fonctionnement: électro-hydraulique

- Elevador asimétrico sin base con barra transversal
- Dos cilindros de elevación en tracción que no requieren mantenimiento.
- Brazos cortos con tres etapas delanteras y traseras bajadas para levantar incluso vehículos grandes y de bajo perfil.
- Altura mínima de la almohadilla de solo 95 mm.
- Válvulas de seguridad para sobrecargas y roturas de tuberías hidráulicas.
- Válvula de control de velocidad de descenso
- Dispositivo de soporte mecánico con inserción automática y desconexión manual.
- Operación: electrohidráulico

Spezieller Hochleistungsmotor mit Thermoschutz liefert üppig bemessene Antriebsleistung und gewährleistet lange Lebensdauer

Moteur spécial à haute performance pour garantir puissance et durée dans le temps, équipé de sonde thermique de protection

Motor especial de alto rendimiento para garantizar potencia y duración en el tiempo, suministrado con termico de protección

Vite rullata in acciaio ad alta resistenza

Steel high resistance rolled screw to provide long life

Kaltgewalzte Spindel aus gehärtetem Stahl für eine lange Lebensdauer

Vis en acier, roulée, à haute résistance, pour garantir la durée dans le temps

Husillo de acero de alta resistencia, rosca fabricada en frio con rodillos para garantizar la maxima duración en el tiempo

Chiocciola portante in PA 6 + MoS2 ad elevata resistenza e sicurezza totale

PA 6 + MoS2 main nut with high resistance to wear for greater safety

Verschleissfeste Tragmutter aus PA 6 + MoS2 gewährleistet totale Sicherheit

Ecrou porteur en PA 6 + MoS2 à haute résistance à l'usure pour garantir une sécurité totale

Tuerca principal en PA 6 + MoS2 de alta resistencia al desgaste para garantizar la seguridad tota

- Sollevatore con sincronizzazione elettronica senza base con massima comodità di movimento della zona di lavoro.
- Possibilità di installazione cavi elettrici al soffitto o incassati nel pavimento.
- La sincronizzazione elettronica fra i carrelli mantiene il dislivello entro un massimo di 24 mm.
- Comandi in bassa tensione.
- Bracci corti e bracci lunghi a tre stadi per il sollevamento asimmetrico di furgoni e fuoristrada.
- Tamponi con altezza minima di soli 85 mm.

- Lift with electronic synchronisation without baseframe for easy movement in the working area.
- The connecting cables can be fixed to the ceiling or recessed into the floor
- Electronic synchronisation between carriages to keep the height difference within max 24 mm
- Low voltage controls
- Short and long three-stage arms for the asymmetric lifting of vans and 4-wheel drive vehicles
- Pads min. height 85 mm. only

- Hebebühne mit elektronischer Gleichlaufsteuerung ohne Grundrahmen für die einfachste Bedienung in der Arbeitszone.
- Die Verbindungsseile können sowohl über die Decke oder im Boden verlegt werden
- Die elektronische Gleichlaufsteuerung regelt den Gleichlauf der Hubschlitten und beschränkt den Ungleichlauf auf max. 24 mm
- Bedienungselemente liegen alle an Niederspannung (24 volt)
- Dreifach teleskopische lange und kurze Arme, um die problemlose asymmetrische Aufnahme von Lieferwagen und 'Off-Road'-Fahrzeugen zu gewährleisten
- Sehr niedrige Arme
- Aufnahmen mit einer Mindest-Unterschwenkhöhe von 85mm

- Elévateur avec synchronisation électronique sans base, facilitant le mouvement dans la zone de travail.
- Installation des câbles de connexion au plafond ou encastrés au sol
- La synchronisation électronique entre les chariots limite la dénivellation à un écart max de 24 mm
- Commandes à bas voltage
- Bras courts et bras longs en trois parties pour le levage asymétrique de fourgons et toutterrains
- Tampons de hauteur min. de 85 mm seulement

- Elevador con sincronización electrónica sin base: permite un fácil acceso al área de trabajo. Posibilidad de instalación de los cables en el techo o empotrados en el suelo
- La sincronización electrónica entre los carritos permite mantener un plazo máximo de desnivelación de 24 mm
- Controles a bajo voltaje
- Brazos cortos y largos a tres etapas para levantamiento asimétrico de furgonetas y vehículos de todoterrenos
- Brazos extra rebajados con pefil paralelo al suelo
- Tampones con altura máxima de sólo 85mm

Bracci predisposti per l'alloggiamento rapido di prolunghé

- Sicurezze meccaniche, elettriche
 - Sollevatore con piattaforma di carico versatile
 - Mobile, quindi utilizzabile sia in interno che esterno
 - Adatto per meccanici, carrozzieri, gommisti stazioni di servizio ed elettrauto
 - Adatto per posizionare l'autovettura sui banchi di riscontro
 - Dimensioni compatte
 - Funzionamento: elettroidraulico
-
-
- Mechanische, elektrische Sicherheit
 - Vielseitiger Ladebühnenheber
 - Mobil, daher sowohl drinnen als auch draußen einsetzbar
 - Geeignet für Mechaniker, Karosseriewerkstätten, Reifenreparaturen, Tankstellen und Autoelektriker
 - Geeignet zum Positionieren des Fahrzeugs auf den Prüfständen
 - Kompakte Größe
 - Bedienung: elektrohydraulisch
-
-
- Seguridad mecánica, eléctrica
 - Elevador de plataforma de carga versátil
 - Móvil, por lo tanto utilizable tanto en interiores como en exteriores
 - Adecuado para mecánicos, talleres de carrocería, reparadores de neumáticos, estaciones de servicio y electricistas
 - Adecuado para colocar el automóvil en los bancos de pruebas.
 - Tamaño compacto
 - Operación: electrohidráulica

- Mechanical, electrical safety
- Versatile load platform lifter
- Mobile, therefore usable both indoors and outdoors
- Suitable for mechanics, body shops, tire repairers, service stations and auto electricians
- Suitable for positioning the car on the test benches
- Compact size
- Operation: electro-hydraulic

- Sécurité mécanique et électrique
- Élèvateur de plate-forme de charge polyvalent
- Mobile, donc utilisable aussi bien à l'intérieur qu'à l'extérieur
- Convient aux mécaniciens, aux ateliers de carrosserie, aux réparateurs de pneus, aux stations-service et aux électriciens automobiles
- Convient pour positionner la voiture sur les bancs d'essai
- Format compact
- Fonctionnement: électro-hydraulique

MECHANICAL SAFETY LOCK WITH PNEUMATIC RELEASE SICURA MECCANICA CON SGANCIO PNEUMATICO

- Adatto e pratico per sollevare motori auto / cambi / batterie.
- Il sollevatore ha la copertura traslante con possibilità di aprirsi e permettere all'operatore di avere lo spazio per sganciare la batteria della vettura comodamente.
- il movimento del ponte è pneumatico
- Geeignet und praktisch zum Heben von Automotoren / Getrieben / Batterien.
- Der Aufzug hat eine Übersetzungsabdeckung mit der Möglichkeit, den Mechaniker Platz zu geben, um die Autobatterie bequem freizugeben.
- Die Bewegung der Brücke ist pneumatisch

- Adecuado y práctico para levantar motores de automóviles / cajas de cambios / baterías.
- El puente tiene una plataforma que se abre y permite que el operador tenga espacio para liberar la batería del automóvil cómodamente.
- El movimiento del puente es neumático.

- Suitable and practical for lifting car engines / gearboxes / batteries for electric or hybrid cars.
- The lift has a translating cover with the possibility of opening and allowing the operator to have space to release the car battery comfortably.
- the movement of the lift is pneumatic.
- Convient et pratique pour soulever les moteurs / boîtes de vitesses / batteries de voiture.
- Le pont a une plate-forme qui s'ouvre et permet à l'opérateur d'avoir suffisamment d'espace pour libérer la batterie de la voiture confortablement
- le mouvement du pont est pneumatique

It facilitates the management of the charge-discharge of the batteries in the new electric cars. made of resistant steel that can handle loads up to 1000 kg. the battery pack can be easily loaded on the trolley platform, lowered to a safe transport height and raised again to unload everything at its destination. It is pneumatic hydraulic drive. Two adjustment screws for securing top when used as work bench surface. Detent pin for locking table top in three open position.

Facilita la gestione del carico-scarico delle batterie nelle nuove auto elettriche. costruiti in acciaio resistente che può gestire carichi fino a 1000 kg. il pacco batteria può essere facilmente caricato sulla piattaforma del carrello, abbassati ad un'altezza di trasporto sicura e sollevati di nuovo per scaricare tutto a destinazione. È azionamento idraulico pneumatico. Due viti di regolazione per fissare la parte superiore quando utilizzate come superficie del banco da lavoro. Perno di arresto per bloccare il piano del tavolo in tre posizioni aperte.

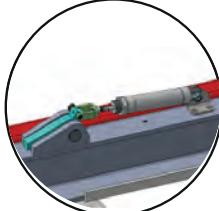

Pneumatic foot pump

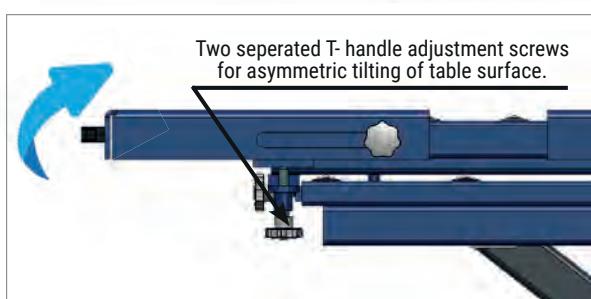

Mechanical safety lock

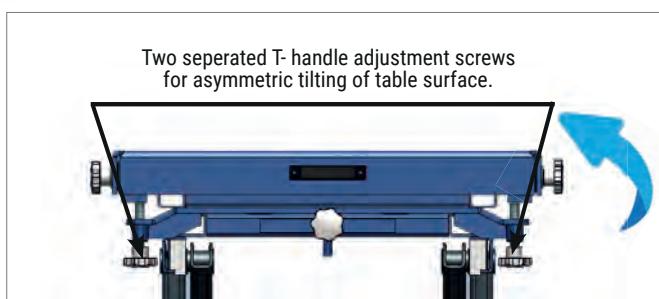

The pulling handle can be put down

Standard pneumatic release for the lock

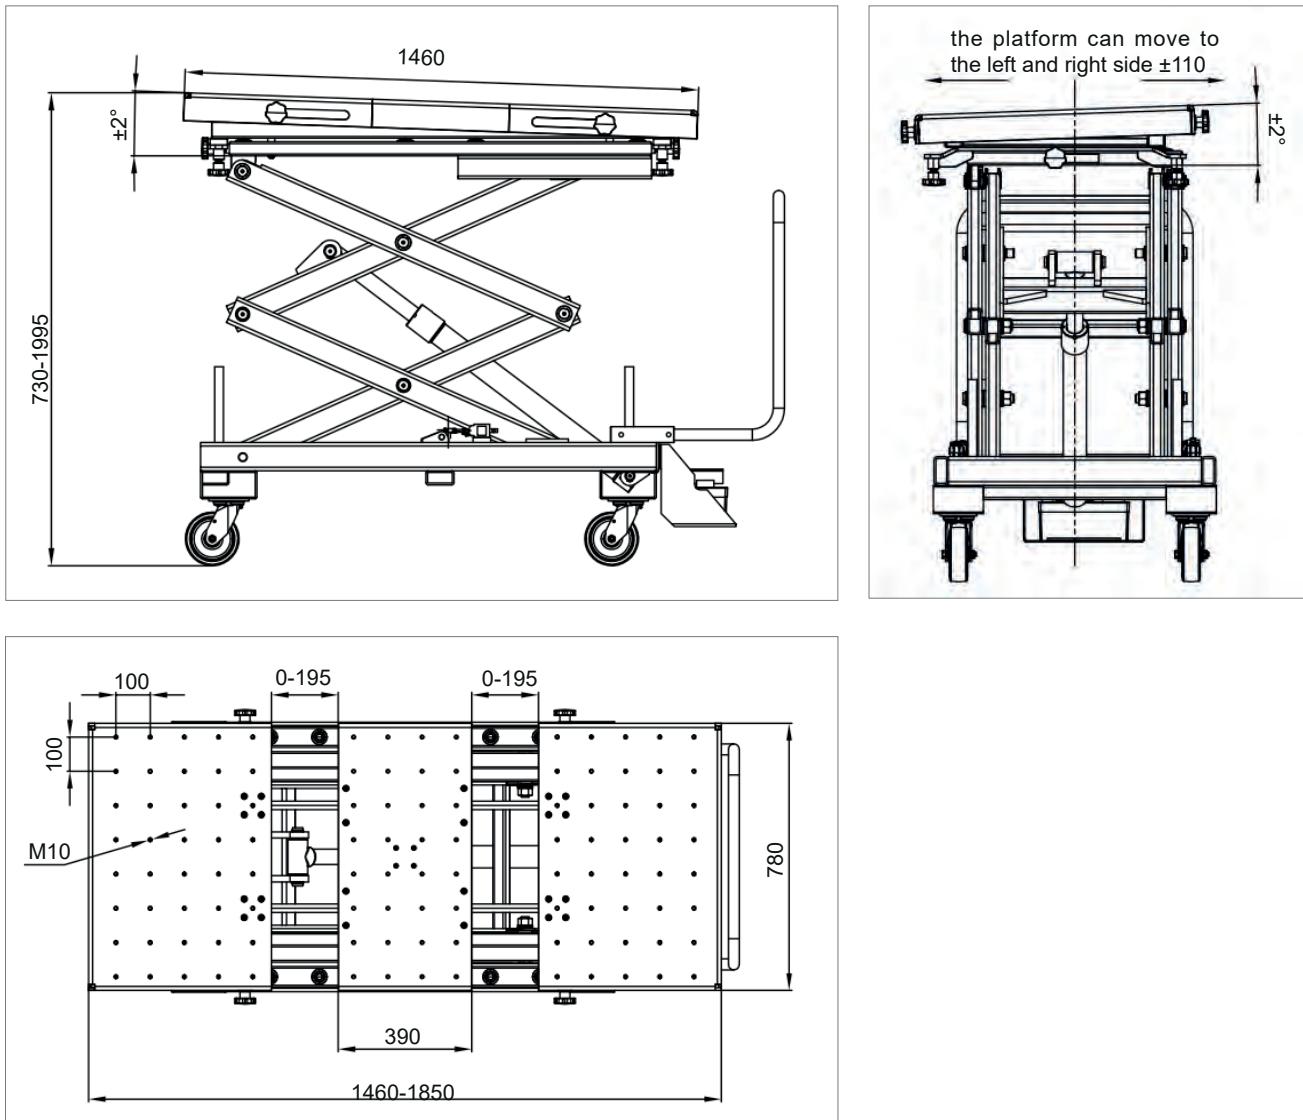

Tilt back and forth by 2°

Tilt left and right by 2°

- Sollevatore asimmetrico senza base con traversa portante
- Due cilindri di sollevamento in tiro che non richiedono alcuna manutenzione.
- Bracci corti a tre stadi anteriori e 2 stadi posteriori super ribassati per il sollevamento anche di veicoli larghi e profilobasso.
- Altezza minima tamponi di soli 85 mm
- Valvole di sicurezza per sovraccarichi e rottura di tubi idraulici
- Valvola di controllo della velocità di discesa
- Dispositivo di appoggio meccanico ad inserimento automatico e disinserimento manuale
- Funzionamento: elettroidraulico

- Asymmetrical lifter without base with carrying crossbar
- Two lifting cylinders in pull that require no maintenance.
- Short arms with three front stages and 2 super-low rear stages for lifting even large vehicles and low profile.
- Minimum pad height of only 85 mm
- Safety valves for overloads and breakage of hydraulic pipes
- Descent speed control valve
- Mechanical support device with automatic insertion and manual disconnection
- Operation: electro-hydraulic

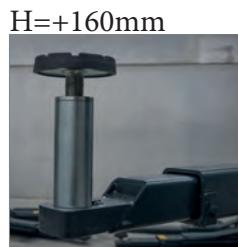

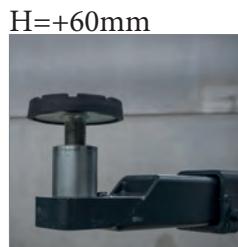

- Asymmetrischer Lifter ohne Sockel mit tragender Querstange
- Zwei Hubzylinder im Zug, die keine Wartung erfordern.
- Kurze Arme mit drei vorderen Stufen und zwei extrem niedrigen hinteren Stufen zum Heben auch großer Fahrzeuge und mit niedrigem Profil.
- Mindestpolsterhöhe von nur 85 mm
- Sicherheitsventile für Überlastungen und Bruch von Hydraulikleitungen
- Regelventil für die Abstiegsgeschwindigkeit
- Mechanische Stützvorrichtung mit automatischem Einsetzen und manuellem Trennen
- Betrieb: elektrohydraulisch

- Élèvateur asymétrique sans base avec barre de transport
- Deux vérins de levage en traction qui ne nécessitent aucun entretien.
- Bras courts avec trois étages avant et 2 étages arrière super bas pour soulever même de gros véhicules et un profil bas.
- Hauteur minimale du patin de seulement 85 mm
- Soupapes de sécurité pour les surcharges et la rupture des tuyaux hydrauliques
- Vanne de régulation de vitesse de descente
- Dispositif de support mécanique avec insertion automatique et déconnexion manuelle
- Fonctionnement: électro-hydraulique

- Elevador asimétrico sin base con barra transversal
- Dos cilindros de elevación en tracción que no requieren mantenimiento.
- Brazos cortos con tres etapas delanteras y 2 etapas traseras súper bajas para levantar incluso vehículos grandes y de bajo perfil.
- Altura mínima de la almohadilla de solo 85 mm.
- Válvulas de seguridad para sobrecargas y roturas de tuberías hidráulicas.
- Válvula de control de velocidad de descenso
- Dispositivo de soporte mecánico con inserción automática y desconexión manual.
- Operación: electrohidráulico

Mandos de hombre presente, 24V

- Sollevatore asimmetrico senza base con traversa portante
- Due cilindri di sollevamento in tiro che non richiedono alcuna manutenzione.
- Bracci corti a tre stadi anteriori e posteriori ribassati per il sollevamento anche di veicoli larghi e profilobasso.
- Altezza minima tamponi di soli 95 mm
- Valvole di sicurezza per sovraccarichi e rottura di tubi idraulici
- Valvola di controllo della velocità di discesa
- Dispositivo di appoggio meccanico ad inserimento automatico e disinserimento manuale
- Funzionamento: elettroidraulico
- Asymmetrical lifter without base with carrying crossbar
- Two lifting cylinders in pull that require no maintenance.
- Short arms with three front stages and rear stages for lifting even large vehicles and low profile.
- Minimum pad height of only 95 mm
- Safety valves for overloads and breakage of hydraulic pipes
- Descent speed control valve
- Mechanical support device with automatic insertion and manual disconnection
- Operation: electro-hydraulic
- Asymmetrischer Lifter ohne Sockel mit tragender Querstange
- Zwei Hubzylinder im Zug, die keine Wartung erfordern.
- Kurze Arme mit drei Stufen vorne und hinten abgesenkt, um auch große Fahrzeuge und niedriges Profil anzuheben.
- Mindestpolsterhöhe von nur 95 mm
- Sicherheitsventile für Überlastungen und Bruch von Hydraulikleitungen
- Regelventil für die Abstiegsgeschwindigkeit
- Mechanische Stützvorrichtung mit automatischem Einsetzen und manuellem Trennen
- Betrieb: elektrohydraulisch
- Élèvateur asymétrique sans base avec barre de transport
- Deux vérins de levage en traction qui ne nécessitent aucun entretien.
- Bras courts avec trois étages avant et arrière abaissés pour soulever même de gros véhicules et un profil bas.
- Hauteur minimale du patin de seulement 95 mm
- Soupapes de sécurité pour les surcharges et la rupture des tuyaux hydrauliques
- Vanne de régulation de vitesse de descente
- Dispositif de support mécanique avec insertion automatique et déconnexion manuelle
- Fonctionnement: électro-hydraulique
- Elevador asimétrico sin base con barra transversal
- Dos cilindros de elevación en tracción que no requieren mantenimiento.
- Brazos cortos con tres etapas delanteras y traseras bajadas para levantar incluso vehículos grandes y de bajo perfil.
- Altura mínima de la almohadilla de solo 95 mm.
- Válvulas de seguridad para sobrecargas y roturas de tuberías hidráulicas.
- Válvula de control de velocidad de descenso
- Dispositivo de soporte mecánico con inserción automática y desconexión manual.
- Operación: electrohidráulico

Motore speciale ad alto rendimento per garantire potenza e durata nel tempo, dotato di sonda termica di protezione

Specially manufactured motor fitted with overheating & overloadprotection switch

Spezieller Hochleistungsmotor mit Thermoschutz liefert üppig bemessene Antriebsleistung und gewährleistet lange Lebensdauer

Moteur spécial à haute performance pour garantir puissance et durée dans le temps, équipé de sonde thermique de protection

Motor especial de alto rendimiento para garantizar potencia y duración en el tiempo, suministrado con termico de protección

Vite rullata in acciaio ad alta resistenza

Steel high resistance rolled screw to provide long life

Kaltgewalzte Spindel aus gehärtetem Stahl für eine lange Lebensdauer

Vis en acier, roulée, à haute résistance, pour garantir la durée dans le temps

Husillo de acero de alta resistencia, rosca fabricada en frio con rodillos para garantizar la maxima duración en el tiempo

Chiocciola portante in PA 6 + MoS2 ad elevata resistenza e sicurezza totale

PA 6 + MoS2 main nut with high resistance to wear for greater safety

Verschleissfeste Tragmutter aus PA 6 + MoS2 gewährleistet totale Sicherheit

Ecrou porteur en PA 6 + MoS2 à haute résistance à l'usure pour garantir une sécurité totale

Tuerca principal en PA 6 + MoS2 de alta resistencia al desgaste para garantizar la seguridad tota

- Sollevatore con sincronizzazione elettronica senza base con massima comodità di movimento della zona di lavoro.
- Possibilità di installazione cavi elettrici al soffitto o incassati nel pavimento.
- La sincronizzazione elettronica fra i carrelli mantiene il dislivello entro un massimo di 24 mm.
- Comandi in bassa tensione.
- Bracci corti e bracci lunghi a tre stadi per il sollevamento asimmetrico di furgoni e fuoristrada.
- Tamponi con altezza minima di soli 85 mm.

- Lift with electronic synchronisation without baseframe for easy movement in the working area.
- The connecting cables can be fixed to the ceiling or recessed into the floor
- Electronic synchronisation between carriages to keep the height difference within max 24 mm
- Low voltage controls
- Short and long three-stage arms for the asymmetric lifting of vans and 4-wheel drive vehicles
- Pads min. height 85 mm. only

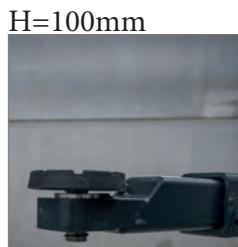

- Hebebühne mit elektronischer Gleichlaufsteuerung ohne Grundrahmen für die einfachste Bedienung in der Arbeitszone.
- Die Verbindungsseile können sowohl über die Decke oder im Boden verlegt werden
- Die elektronische Gleichlaufsteuerung regelt den Gleichlauf der Hubschlitten und beschränkt den Ungleichlauf auf max. 24 mm
- Bedienungselemente liegen alle an Niederspannung (24 volt)
- Dreifach teleskopische lange und kurze Arme, um die problemlose asymmetrische Aufnahme von Lieferwagen und 'Off-Road'-Fahrzeugen zu gewährleisten
- Sehr niedrige Arme
- Aufnahmen mit einer Mindest-Unterschwenkhöhe von 85mm

- Elévateur avec synchronisation électronique sans base, facilitant le mouvement dans la zone de travail.
- Installation des câbles de connexion au plafond ou encastrés au sol
- La synchronisation électronique entre les chariots limite la dénivellation à un écart max de 24 mm
- Commandes à bas voltage
- Bras courts et bras longs en trois parties pour le levage asymétrique de fourgons et toutterrains
- Tampons de hauteur min. de 85 mm seulement

- Elevador con sincronización electrónica sin base: permite un fácil acceso al área de trabajo. Posibilidad de instalación de los cables en el techo o empotrados en el suelo
- La sincronización electrónica entre los carritos permite mantener un plazo máximo de desnivelación de 24 mm
- Controles a bajo voltaje
- Brazos cortos y largos a tres etapas para levantamiento asimétrico de furgonetas y vehículos de todoterrenos
- Brazos extra rebajados con pefil paralelo al suelo
- Tampones con altura máxima de sólo 85mm
